

Build Your Own Butterfly

Butterflies are everywhere and are all different colors. Put together and color one of your own. (Ask an adult to help you.) Here's how . . .

You will need ----

1. The pattern of butterfly wings and butterfly bodies on the next page
2. A pair of utility scissors

You will want to ask an adult to use the scissors. Do not use them yourself.

3. Colored markers or crayons
Lots of colors would be nice.
4. Glue
5. Pipe cleaners (optional)
6. Some old towels to cover the work area

Let's Get Started----

1. Begin this project by laying out the towels in your work area.
2. Using the color markers or crayons, color the butterfly wings and butterfly bodies any color that you like. Use lots of colors and maybe some colorful patterns.
3. Cut out the butterfly bodies and butterfly wings along the outside lines. Be sure to ask an adult to help with using the scissors.
4. Fit and glue each of the butterfly bodies onto a pair of wings according to the instructions.
5. If you have pipe cleaners, bend one in half and glue the pipe cleaners onto the butterfly's head.
6. Now, you have built your very own butterflies.

Build your own Butterfly!
